The following graphs (right) contain data compiled from the Kentucky Parole Board Annual Reports from FY06-FY15. The line graph shows the percentage of cases recommended by the Parole Board for parole vs. serve out over the 10-year period. The bar chart shows total percentages of all cases reviewed by the Parole Board which were recommended for parole, serve out, or deferred. Note that when looking at the bar chart, some years do not equal 100%, this is because a small percentage of all cases had no action taken. The “no action” cases are not included in the visual.
